**3U CompactPCI Processor Board based on
the Intel® Atom™ Processor N270 with
the Mobile Intel® 945GSE Express Chipset**

Doc. ID: 1035-7168, Rev. 2.0
February 11, 2011

Revision History

Publication Title:		CP305: 3U CompactPCI Processor Board based on the Intel® Atom™ Processor N270 with the Mobile Intel® 945GSE Express Chipset
Doc. ID:		1035-7168
Rev.	Brief Description of Changes	Date of Issue
1.0	Initial issue	29-Sep-2009
2.0	Added description for the CP305-TR Module	11-Feb-2011

Proprietary Note

This document contains information proprietary to Kontron. It may not be copied or transmitted by any means, disclosed to others, or stored in any retrieval system or media without the prior written consent of Kontron or one of its authorized agents.

The information contained in this document is, to the best of our knowledge, entirely correct. However, Kontron cannot accept liability for any inaccuracies or the consequences thereof, or for any liability arising from the use or application of any circuit, product, or example shown in this document.

Kontron reserves the right to change, modify, or improve this document or the product described herein, as seen fit by Kontron without further notice.

Trademarks

This document may include names, company logos and trademarks, which are registered trademarks and, therefore, proprietary to their respective owners.

Environmental Protection Statement

This product has been manufactured to satisfy environmental protection requirements where possible. Many of the components used (structural parts, printed circuit boards, connectors, batteries, etc.) are capable of being recycled.

Final disposition of this product after its service life must be accomplished in accordance with applicable country, state, or local laws or regulations.

Explanation of Symbols

Caution, Electric Shock!

This symbol and title warn of hazards due to electrical shocks (> 60V) when touching products or parts of them. Failure to observe the precautions indicated and/or prescribed by the law may endanger your life/health and/or result in damage to your material.

Please refer also to the section “High Voltage Safety Instructions” on the following page.

Warning, ESD Sensitive Device!

This symbol and title inform that electronic boards and their components are sensitive to static electricity. Therefore, care must be taken during all handling operations and inspections of this product, in order to ensure product integrity at all times.

Please read also the section “Special Handling and Unpacking Instructions” on the following page.

Warning!

This symbol and title emphasize points which, if not fully understood and taken into consideration by the reader, may endanger your health and/or result in damage to your material.

Note ...

This symbol and title emphasize aspects the reader should read through carefully for his or her own advantage.

For Your Safety

Your new Kontron product was developed and tested carefully to provide all features necessary to ensure its compliance with electrical safety requirements. It was also designed for a long fault-free life. However, the life expectancy of your product can be drastically reduced by improper treatment during unpacking and installation. Therefore, in the interest of your own safety and of the correct operation of your new Kontron product, you are requested to conform with the following guidelines.

High Voltage Safety Instructions

Warning!

All operations on this device must be carried out by sufficiently skilled personnel only.

Caution, Electric Shock!

Before installing a not hot-swappable Kontron product into a system always ensure that your mains power is switched off. This applies also to the installation of piggybacks.

Serious electrical shock hazards can exist during all installation, repair and maintenance operations with this product. Therefore, always unplug the power cable and any other cables which provide external voltages before performing work.

Special Handling and Unpacking Instructions

ESD Sensitive Device!

Electronic boards and their components are sensitive to static electricity. Therefore, care must be taken during all handling operations and inspections of this product, in order to ensure product integrity at all times.

Do not handle this product out of its protective enclosure while it is not used for operational purposes unless it is otherwise protected.

Whenever possible, unpack or pack this product only at EOS/ESD safe work stations. Where a safe work station is not guaranteed, it is important for the user to be electrically discharged before touching the product with his/her hands or tools. This is most easily done by touching a metal part of your system housing.

It is particularly important to observe standard anti-static precautions when changing piggybacks, ROM devices, jumper settings etc. If the product contains batteries for RTC or memory backup, ensure that the board is not placed on conductive surfaces, including anti-static plastics or sponges. They can cause short circuits and damage the batteries or conductive circuits on the board.

General Instructions on Usage

In order to maintain Kontron's product warranty, this product must not be altered or modified in any way. Changes or modifications to the device, which are not explicitly approved by Kontron and described in this manual or received from Kontron's Technical Support as a special handling instruction, will void your warranty.

This device should only be installed in or connected to systems that fulfill all necessary technical and specific environmental requirements. This applies also to the operational temperature range of the specific board version, which must not be exceeded. If batteries are present, their temperature restrictions must be taken into account.

In performing all necessary installation and application operations, please follow only the instructions supplied by the present manual.

Keep all the original packaging material for future storage or warranty shipments. If it is necessary to store or ship the board, please re-pack it as nearly as possible in the manner in which it was delivered.

Special care is necessary when handling or unpacking the product. Please consult the special handling and unpacking instruction on the previous page of this manual.

Two Year Warranty

Kontron grants the original purchaser of Kontron's products a ***TWO YEAR LIMITED HARDWARE WARRANTY*** as described in the following. However, no other warranties that may be granted or implied by anyone on behalf of Kontron are valid unless the consumer has the express written consent of Kontron.

Kontron warrants their own products, excluding software, to be free from manufacturing and material defects for a period of 24 consecutive months from the date of purchase. This warranty is not transferable nor extendible to cover any other users or long-term storage of the product. It does not cover products which have been modified, altered or repaired by any other party than Kontron or their authorized agents. Furthermore, any product which has been, or is suspected of being damaged as a result of negligence, improper use, incorrect handling, servicing or maintenance, or which has been damaged as a result of excessive current/voltage or temperature, or which has had its serial number(s), any other markings or parts thereof altered, defaced or removed will also be excluded from this warranty.

If the customer's eligibility for warranty has not been voided, in the event of any claim, he may return the product at the earliest possible convenience to the original place of purchase, together with a copy of the original document of purchase, a full description of the application the product is used on and a description of the defect. Pack the product in such a way as to ensure safe transportation (see our safety instructions).

Kontron provides for repair or replacement of any part, assembly or sub-assembly at their own discretion, or to refund the original cost of purchase, if appropriate. In the event of repair, refunding or replacement of any part, the ownership of the removed or replaced parts reverts to Kontron, and the remaining part of the original guarantee, or any new guarantee to cover the repaired or replaced items, will be transferred to cover the new or repaired items. Any extensions to the original guarantee are considered gestures of goodwill, and will be defined in the "Repair Report" issued by Kontron with the repaired or replaced item.

Kontron will not accept liability for any further claims resulting directly or indirectly from any warranty claim, other than the above specified repair, replacement or refunding. In particular, all claims for damage to any system or process in which the product was employed, or any loss incurred as a result of the product not functioning at any given time, are excluded. The extent of Kontron liability to the customer shall not exceed the original purchase price of the item for which the claim exists.

Kontron issues no warranty or representation, either explicit or implicit, with respect to its products' reliability, fitness, quality, marketability or ability to fulfil any particular application or purpose. As a result, the products are sold "as is," and the responsibility to ensure their suitability for any given task remains that of the purchaser. In no event will Kontron be liable for direct, indirect or consequential damages resulting from the use of our hardware or software products, or documentation, even if Kontron were advised of the possibility of such claims prior to the purchase of the product or during any period since the date of its purchase.

Please remember that no Kontron employee, dealer or agent is authorized to make any modification or addition to the above specified terms, either verbally or in any other form, written or electronically transmitted, without the company's consent.

Introduction

This page has been intentionally left blank.

1. Introduction

1.1 Board Overview

The CP305 is a highly integrated, 3U, 4 HP or 8 HP, lead-free CompactPCI system controller board. It has been designed to support the Intel® Atom™ Processor N270 with 1.6 GHz frequency and 533 MHz Front Side Bus (FSB) in 437 µFCBGA8 packaging.

The CP305 utilizes the Mobile Intel® 945GSE Express Graphics Memory Controller Hub (945GSE Express GMCH) and the ICH7-M I/O Controller Hub.

The board includes up to 2 GB of soldered Double Data Rate 2 (DDR2) memory operating at 533 MHz.

The 4HP CP305 comes with an onboard SATA port, two Gigabit Ethernet ports (Intel® 82574L), two USB 2.0 ports on the front panel, and a built-in Intel 3D Graphics accelerator for enhanced graphics performance with a VGA analog display interface. A CompactFlash socket for type I and type II CompactFlash cards is provided via the CP305-CF piggy-back module of the CP305. Several onboard connectors provide flexible 8HP expandability.

The board supports one 32-bit/33 MHz CompactPCI interface acting as system master CPU only.

The optional CP305-HDD module has been designed to make various legacy PC I/O ports available as well as DVI and USB interfacing. It includes one COM port, a PS/2 keyboard and mouse port, a 2.5" onboard hard disk SATA interface, a PATA IDE connector (i.e. for a CD/DVD drive), two USB 2.0 ports, and a DVI-D interface.

Designed for stability and packaged in a rugged format, the board fits into all applications situated in industrial environments, including I/O intensive applications where only one slot is available for the CPU, making it a perfect core technology for long-life applications. Components which have high temperature tolerance have been selected from embedded technology programs, and therefore offer long-term availability.

There are various operating systems available for the CP305. For detailed information, please contact Kontron.

1.2 Board-Specific Information

The CP305 is a CompactPCI single-board computer based on Intel's Atom™ Processor technology and is specifically designed for use in highly integrated platforms with solid mechanical interfacing for a wide range of industrial environment applications.

Some of the CP305's outstanding features are:

- Intel® Atom™ Processor N270:
 - 1.6 GHz core frequency
 - 533 MHz FSB
 - 437-pin µFCBGA8 package
 - 56 kB L1 and 512 kB L2 cache on-die, running at CPU speed
- 945GSE and 82801GM (ICH7-M) chipset
- Up to 2 GB DDR2 SDRAM memory running at 533 MHz
- Integrated 3D high-performance VGA controller
- Analog display support of up to 2048 x 1536 pixels at 75 Hz
- DVI-D option (with 8HP version)
- Two Gigabit Ethernet interfaces (82574L)
- Two Serial ATA (SATA) interfaces switchable to rear I/O
- One IDE Ultra ATA/100 interface
- Onboard Compact Flash socket for type I and type II CompactFlash cards (True IDE with DMA) on CP305-CF module for 4HP version and CP305-HDD module for 8HP version
- Six USB ports
 - Two Front USB 2.0
 - Two further Front USB 2.0 on the 8HP version
 - Two Rear I/O USB 2.0
- Compatible with CompactPCI Specification PICMG 2.0. Rev. 3.0
- 1 MB onboard FWH for BIOS
- Hardware Monitor (Super I/O SCH3112)
- Watchdog timer
- Real-time clock
- Two COM ports on Rear I/O (with an optional single port on the front I/O on 8HP version)
- I/O extension connectors (SATA, SDVO, USB, PS/2, LPC, IDE, COM, as well as Monitor and Control signals)
- 4HP or 8HP, 3U CompactPCI
- Reset push button switch (with 8HP version)
- Several Rear I/O configurations
- Jumperless board configuration
- Power-up sequencing and in-rush current optimized design
- Passive heat sink solution
- AMI BIOS

1.3 Optional Modules

1.3.1 CP305-HDD Module

The CP305-HDD module for the 8 HP CP305 version provides legacy PC I/O ports. It includes one digital DVI port, two USB 2.0 ports, one COM port, a PS/2 keyboard and mouse port, one IDE connector, and one CompactFlash socket. A SATA hard disk interface is also available for mounting a 2.5" hard disk drive.

For further information concerning the CP305-HDD module, refer to Appendix A.

1.3.2 CP305-TR Module

The Kontron CP305-TR module for the 8 HP CP305 version has been designed for use in mobile- and transportation-oriented applications where robust, mechanically secured connections are required. It includes two Fast Ethernet ports via M12, D-coded connectors, two USB 2.0 service ports via M8, A-coded connectors and three GPO LEDs on the front panel as well as two onboard COM ports, one onboard GPIO port, one CompactFlash socket, two onboard SATA ports for connection to external SATA devices and one CompactPCI connector for connecting the CP305-TR to the backplane.

For further information concerning the CP305-TR module, refer to Appendix B

1.3.3 CP-RIO3-04 Rear I/O Module

The CP-RIO3-04 rear I/O module has been designed for use with the CP305 board from Kontron and provides comprehensive rear I/O functionality.

For further information concerning the CP-RIO3-04 rear I/O module, refer to Appendix C.

1.4 System Relevant Information

The following system relevant information is general in nature but should still be considered when developing applications using the CP305.

Table 1-1: System Relevant Information

SUBJECT	INFORMATION
System Configuration	The CP305 system controller board can support up to 7 peripheral boards with 32-bit and 33 MHz.
Master/Slave Functionality	The CP305 can operate only as a master board.
Board Location in the System	The CP305 board must be installed in a system slot of a CompactPCI backplane.
Hot Swap Compatibility	The CP305 supports the addition or removal of other boards whilst in a powered-up state. Individual clocks for each slot and ENUM signal handling are in compliance with the PICMG 2.1 Hot Swap specification.
Hardware Requirements	The CP305 can be installed in any CompactPCI 3U rack.
Operating Systems	There are various operating systems available for the CP305. For detailed information, please contact Kontron.

1.5 Board Diagrams

The following diagrams provide additional information concerning board functionality and component layout.

1.5.1 Functional Block Diagram

Figure 1-1: CP305 Functional Block Diagram

1.5.2 Front Panel

Figure 1-2: CP305 4HP Front Panel

LEGEND:

CP305: 4HP version

General Purpose LEDs:

WD/GP (green): Watchdog or General Purpose; when lit during power-on, it indicates a PCI reset is active.

TH/GP (green): Overtemperature Status or General Purpose; when lit during power-on, it indicates a power failure.

Note ...

If the WD/GP LED and the TH/GP LED keep flashing during BIOS initialization, a POST code is indicated.

For further information on the blinking intervals of the WD/GP LED and the TH/GP LED refer to section 2.3.1 General Purpose LED Output.

Integral Ethernet LEDs

ACT (green): Ethernet Link/Activity

SPEED (green/orange): Ethernet Speed

SPEED ON (orange): 1000 Mbit

SPEED ON (green): 100 Mbit

SPEED OFF: 10 Mbit

Note ...

For detailed information on the 8HP CP305 version, refer to Appendix A, CP305-HDD module.

1.5.3 Board Layout

Figure 1-3: 4 HP CP305 Board Layout (Top View)

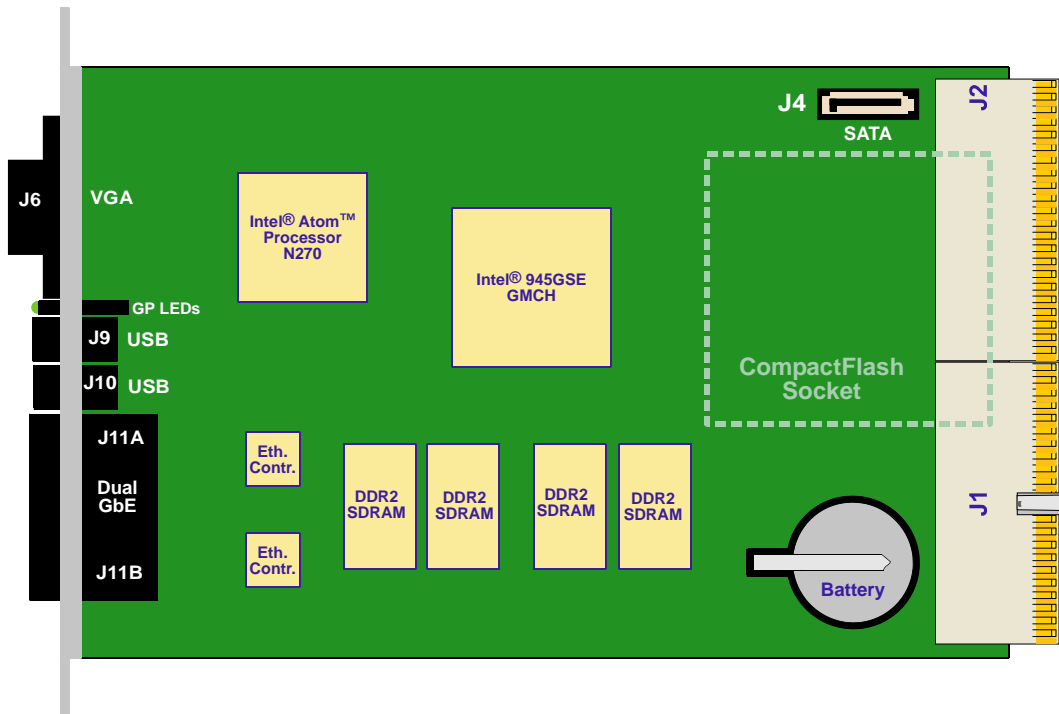

Figure 1-4: 4 HP CP305 Board Layout (Bottom View)

1.6 Technical Specification

Table 1-2: CP305 4HP Version Main Specifications

CP305		SPECIFICATIONS
Processor and Memory	CPU	<p>The CP305 supports the following microprocessor:</p> <ul style="list-style-type: none"> Intel® Atom™ Processor N270: <ul style="list-style-type: none"> 1.6 GHz core frequency 533 MHz FSB 437-pin µFCBGA8 package 56 kB L1 and 512 kB L2 cache on-die, running at CPU speed

	Operating Systems	<p>There are various operating systems available for the CP305. For detailed information, please contact Kontron.</p>

Table 1-2: CP305 4HP Version Main Specifications (Continued)

CP305		SPECIFICATIONS
General	Mechanical	3U, 4HP, CompactPCI compliant form factor
	Power Consumption	typ. 10 W For further information, refer to Chapter 5.
	Temperature Range	Operational: 0°C to +60°C Standard -40°C to +80°C Extended (without hard disk and in the appropriate system environment) Storage: -55°C to +85°C Without hard disk and without battery -40°C to +65°C With hard disk and without battery  Note ... When a battery is installed, refer to the operational specifications of the battery as this determines the storage temperature of the CP305 (See "Battery" below).  Note ... When additional components are installed, refer to their operational specifications as this will influence the board's operational and storage temperature.
	Climatic Humidity	93% RH at 40°C, non-condensing (acc. to IEC 60068-2-78)
	Dimensions	100 mm x 160 mm
	Board Weight	320 grams (4HP variants with heat sink, with front panel but without mezzanine boards)
	Battery	3.0V lithium battery for RTC with battery socket. Recommended type: CR2025 Temperature ranges: Operational (load): -20°C to +70°C typical (refer to the battery manufacturer's specifications for exact range) Storage (no load): -55°C to +70°C typical (no discharge)

Note ...

For a description of the additional 8HP version interfaces, refer to the Technical Specifications table in Appendix A, CP305-HDD module.

1.7 Kontron Software Support

Kontron is one of the few CompactPCI and VME vendors providing inhouse support for most of the industry-proven real-time operating systems that are currently available. Due to its close relationship with the software manufacturers, Kontron is able to produce and support BSPs and drivers for the latest operating system revisions thereby taking advantage of the changes in technology.

1.8 Standards

This Kontron product complies with the requirements of the following standards.

Table 1-3: Standards

TYPE	ASPECT	STANDARD
CE	Emission	EN55022 EN61000-6-3
	Immission	EN55024 EN61000-6-2
	Electrical Safety	EN60950-1
Mechanical	Mechanical Dimensions	IEEE 1101.10
Environmental	Climatic Humidity	IEC60068-2-78 (see note below)
	WEEE	Directive 2002/96/EC Waste electrical and electronic equipment
	RoHS	Directive 2002/95/EC Restriction of the use of certain hazardous substances in electrical and electronic equipment

Note ...

Kontron performs comprehensive environmental testing of its products in accordance with applicable standards.

Users desiring to perform further environmental testing of Kontron products must contact Kontron for assistance prior to performing any such testing. This is necessary, as it is possible that environmental testing can be destructive when not performed in accordance with the applicable specifications.

In particular, for example, boards **without conformal coating** must not be exposed to a change of temperature exceeding 1K/minute, averaged over a period of not more than five minutes. Otherwise, condensation may cause permanent damage, especially when the board is powered up again.

Kontron does not accept any responsibility for damage to products resulting from destructive environmental testing.

In addition, boards providing ruggedized service comply with the following standards as well.

Table 1-4: Additional Standards for Boards with Ruggedized Service

TYPE	ASPECT	STANDARD	REMARKS
Environmental	Vibration (Sinusoidal)	IEC60068-2-6	Ruggedized version test parameters: <ul style="list-style-type: none"> • 10-300 (Hz) frequency range • 5 (g) acceleration • 1 (oct/min) sweep rate • 10 cycles/axis • 3 axis
	Single Shock	IEC60068-2-27	Ruggedized version test parameters: <ul style="list-style-type: none"> • 30 (g) acceleration • 9 (ms) shock duration half sine • 3 number of shocks per direction (total: 18) • 6 directions • 5 (s) recovery time
	Permanent Shock	IEC60068-2-29	Ruggedized version test parameters: <ul style="list-style-type: none"> • 15 (g) acceleration • 11 (ms) shock duration half sine • 500 number of shocks per direction • 6 directions • 5 (s) recovery time

Furthermore, boards providing ruggedized service and conformal coating comply with the following standards as well.

Table 1-5: Add. Standards for Boards with Ruggedized Service and Conformal Coating

TYPE	ASPECT	STANDARD	REMARKS
Railway	Electromagnetic Compatibility (EMC)	EN50155	--
		EN50121-3-2	--
	Temperature	EN50155	Class T2
	Shock and Vibration	EN50155	--
		EN60373	Class 1B
	Climatic Humidity	EN50155	--
