FlatView
A new Level of flexibility and versatility

With its FlatView industrial monitor series, Kontron offers high flexibility with respect to the design. With a full metal housing the monitor can be installed as a stand-alone solution with VESA 75/75 or 100/100, as well as a built-in solution.

All FlatView models feature an easy-clean, anti-glare and scratch-proof IP65 protected front glass. The front options offer a choice between either PCAP touch, resistive touch, or protection glass.

The FlatView monitors are available from 10.1" to 23.8", which can be operated in both landscape and portrait format.

Combined with Kontron's FlatClient, KBox or rackmount family, the FlatView enables intuitive multi-touch access to real-time actionable data, making it the perfect fit for SCADA and Manufacturing Execution Systems (MES), process visualization and other control applications.

The thoroughly modular design can be easily customized for a broad variety of applications, thus making it suitable across all industries which require the visualization and processing of data.
